

Athletic Facilities Planning and Design

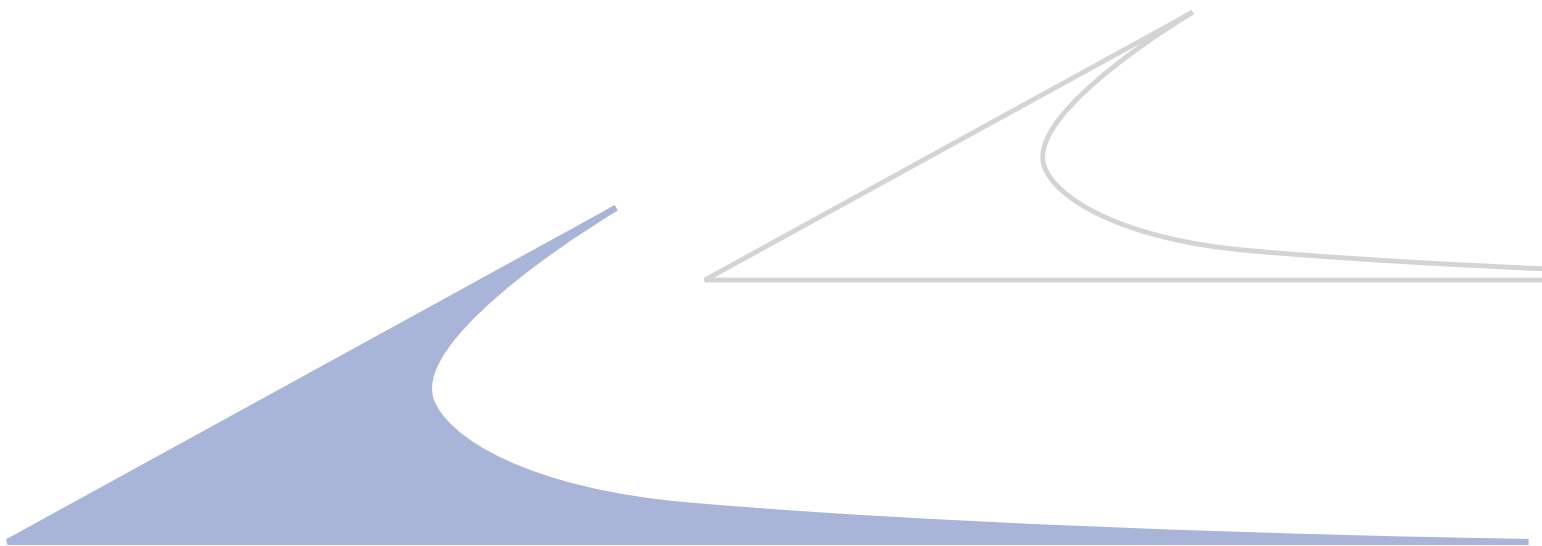

CELEBRATING 50 YEARS

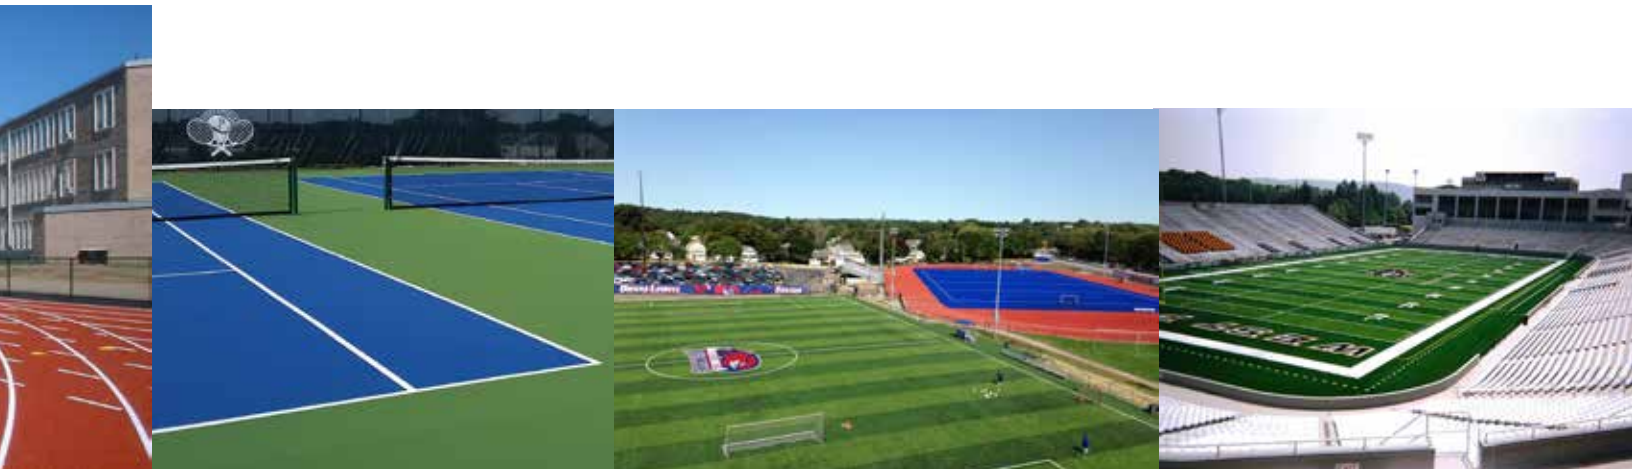

About Gale

Established in 1964, Gale Associates, Inc. is a consulting firm of engineers, architects, and building enclosure experts specializing in the repair, renovation, and adaptive reuse of existing sites, buildings, and infrastructures. Our services include athletic facilities planning and design, building enclosure design and consulting, civil engineering, airport engineering and planning, and structural engineering.

Athletic Facilities Planning and Design

Gale's Athletic Facilities Planning and Design Group provides comprehensive planning, design, and construction services for public and private athletic facilities managers, and recreation directors. As an industry leader in athletic facility consulting, we assist our clients in creating facilities that range from state-of-the-art, all-weather university sports complexes to municipal parks and youth sport facilities.

Services

- Well-integrated athletic campus master plans that make the best use of available funds and space
- Real time cost estimates for all types of surfacing and equipment
- Development of multiple sports system (surfacing, seating, lighting, etc.) design options and the value engineering required to design to budget
- Facilitated project permitting based on detailed understanding of the impacts (environmental, health, light, drainage, etc.) of proposed systems and materials
- A detailed and current understanding of NCAA, USHSF, ASBA, IAFF and other applicable athletic standards for geometry, planarity, and markings
- Proven construction details for installation of all sports equipment and related amenities (goals, netting, scoring, etc.)
- Full consideration of ADA requirements throughout the process
- Detailed planning of sports complex utility infrastructure (electrical, scoring, water, lighting, etc.)
- A sports consultant's understanding of game and meet operations and management
