

Civil Engineering

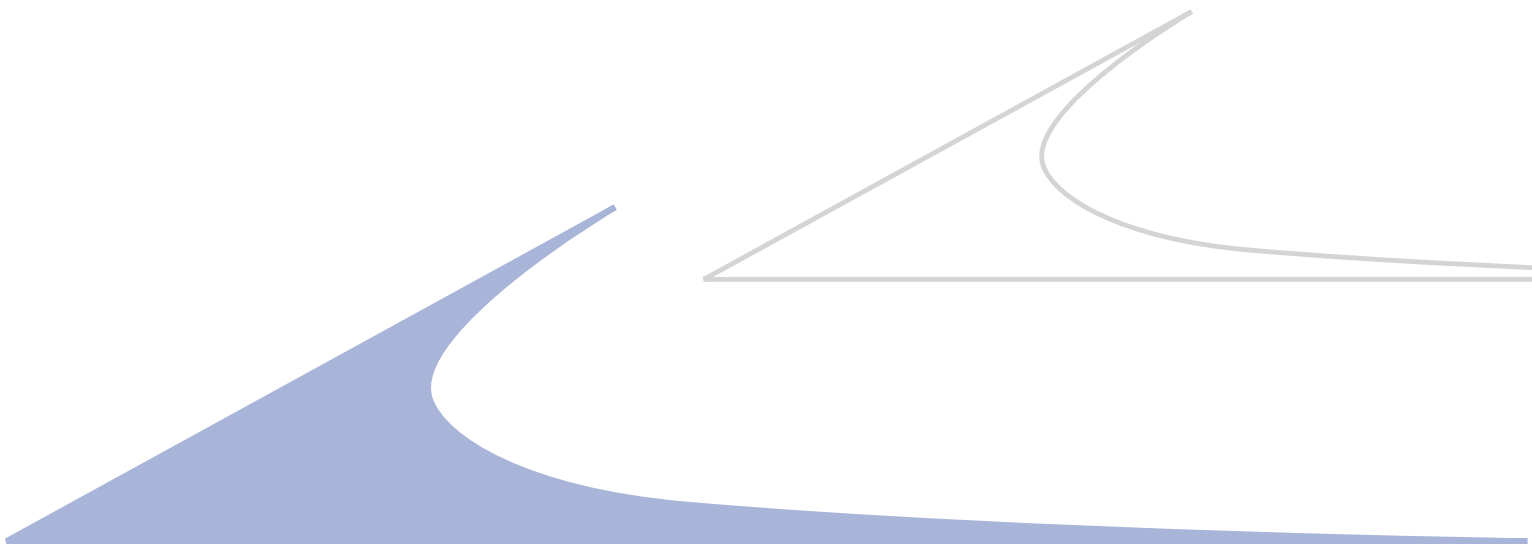

CELEBRATING 50 YEARS

GALE

About Gale

Established in 1964, Gale Associates, Inc. is a consulting firm of engineers, architects, and building enclosure experts specializing in the repair, renovation, and adaptive reuse of existing sites, buildings, and infrastructures. Our services include civil engineering, building enclosure design and consulting, athletic facilities planning and design, airport engineering and planning, and structural engineering.

Civil Engineering and Land Planning

Gale's Civil Engineering Group provides comprehensive land planning and site engineering services for residential, institutional, and commercial clients. We perform site design for all types of facilities including layout, grading, hydrology and drainage design, landscape design, and utilities planning and design. Gale provides sub-division planning and permitting services at the municipal, state, and federal levels. We offer public and private owners a complete package of design, bid, and construction period services from project startup through closeout.
