

## Airport Engineering and Planning

CELEBRATING 50 YEARS

**GALE**

## About Gale

Established in 1964, Gale Associates, Inc. is a consulting firm of engineers, architects, and building enclosure experts specializing in the repair, renovation, and adaptive reuse of existing buildings, sites, and infrastructures. Our services include airport engineering and planning, building enclosure design and consulting, athletic facilities planning and design, civil engineering, and structural engineering.

## Airport Engineering and Planning

Gale's Airport Engineering and Planning Group provides planning, permitting, design, and construction administration services to public and private aviation clients. Our staff is experienced in all facets of aviation services, from the development of environmentally-sound airport planning strategies to the reconstruction and improvement of airport facilities infrastructure. Gale excels in navigating the numerous regulatory, permitting, and approval processes unique to the aviation industry. We provide a full range of services for airport infrastructure improvements, both airside and landside.
